

EKYGARD

Gastric wall protection

EKYGARD is a dietary supplement in the form of palatable granules for protecting the alimentary tract. It has been specially formulated to:

- Protect the stomach lining.
- Limit acid production.
- Boost the healing process.

When EKYGARD comes into contact with the gastric mucosa, it causes a chain reaction leading to formation of dense, thick and **protective colloidal gel**. The fibres (Laminaria and Ispaghul) adhere to the mucosa and assist with pectin and lecithin cohesion. Glycerin and Bentonite clay reinforce this protective layer for optimum results.

Better protected, the mucosa will **heal** more easily. This action is boosted by the soothing effect of Green Anise and Marsh Mallow (*Althaea officinalis*) and the healing effect of Aloe Vera and Liquorice. The sodium bicarbonate helps to **limit gastric acidity**.

For horses, each ingredient has been carefully selected by Laboratoires Audevard to ensure optimum effectiveness. Lecithin is micro-encapsulated, making it most active in an acid medium such as the stomach. Lecithin and Laminaria are microfined.

Uses

Dietary supplement particularly used for:

- Athletic horses during periods of training
- Horses with a prior history of sensitivity of the gastric muscosa
- Horses undergoing tretment (foals and adults) treated for: gastric ulceration, enteritis, colic
- Medicated foals

Study

Studies were carried out at Chantilly, France, with improvement highly significant ($p < 0.05$) in all areas of the equine stomach. 90% of all treated horses showed clinical improvement after 3 weeks of treatment.

Composition

Sodium bicarbonate	Green Aniseed (<i>Pimpinella anisum</i>)	Aloe (Aloe vera)
Pectin	Marsh Mallow (<i>Althaea offi cinalis</i>)	Liquorice (<i>Glycyrrhiza glabra</i>)
Lecithin	Ispaghula (<i>Plantago ovata</i>)	Bentonit clay

Instructions for use

Adult: 40g (1 level measure) morning and evening for 30 days.

Foal: 20g (1/2 measure) morning and evening for 30 days.

EKYGARD may be administered all year-round or regularly. Ask your vet for advice.

Presentation

2.4 kg box – EAN 3515657752440. Enables 30 days of administration..
